Enabling Screen Sharing in Mac

1. Go to **System Preferences**.
2. Select **Security and Privacy**.
3. Under *Privacy*, click **Screen recording**.
4. Provide permission for your browser or app.

5. A pop-up will appear asking you to quit the app or browser you are using and log in again with the new setting.

If the problem still exist

Unable to share screen after enabling permissions

Sometimes you may be unable to share your screen even after enabling the necessary permissions mentioned above. This is due to a <u>bug</u> that exists in the Google Chrome browser. Please follow the steps below to share your screen when this happens.

1. Minimize your Google Chrome window (exit fullscreen).
2. Click **Start sharing**, then select **Entire screen** or **Application**.

3. Select the screen or application you want to share and click **Share.**
